## AMENDMENTS TO THE SPECIFICATION:

Please replace the second paragraph on page 23 with the following amended paragraph:

Other embodiments are shown in Fig's. 5A, 5B, 6A, 6B, 6C, 6D, 6E, 6F, 6G and 6H. Fig's. 4A, 4B 5A, 5B, 6A, 6B, 6C, 6D, 6E, 6F, 6G and 6H include a substrate having a substantially planar first surface oppositely spaced apart from a substantially planar second surface and an individually addressable Organic Light Emitting Diode (OLED) structure. In the embodiment shown in Fig's. 6A, 6B, 6C and 6D, a substantially transparent layer is deposited onto the OLED structure. The substantially transparent layer has a light receiving surface in effective light transmission relation to the transparent anode; the light receiving surface is oppositely spaced apart from a light emitting surface. A color filter material is deposited onto the light receiving surface of the transparent layer.
